

Cleaning tape

Cleaning tape

ACCESSORIES

 **Teca-Print**
 **Teca-Print**

Characteristics of the cleaning tape:

Teca-Print's cleaning tape was specially developed for our pad cleaning devices and ensures a reliable cleaning process, while leaving almost no ink residue.

We tested the cleaning tape with our machines and found that it was one of the only tapes of its kind on the market that was able to fulfill our high demands. Very important for us was how this particular tape with its increased adhesive qualities would influence the drive motor of the various cleaning devices. Another criterion was that the tape band held onto its adhesive layer and did not release small pieces which would dirty the pad. Our pad cleaning tape has proved to provide the best results and will help you to obtain optimal printing results.

Types of cleaning tape:

We offer two types of cleaning tape for your pad cleaning units:

Standard Quality

with the following characteristics:

- ✓ with fine structure
- ✓ repeated application is possible
- ✓ excellent price-performance ratio
- ✓ unroll length can be adjusted in small, incremental steps (overlapping of the image is possible)

art.-no.	width	length in m
90 09 15	50 mm	50 m
58594 0014	75 mm	50 m
58594 0013	100 mm	50 m
58594 0007	130 mm	50 m

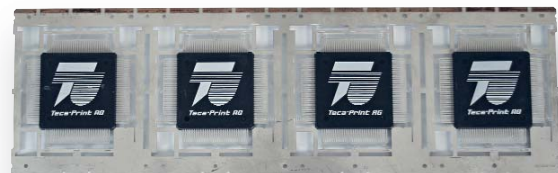

Extra Durable Quality

with the following characteristics:

- ✓ no structure (transparent)
- ✓ very effective adhesiveness
- ✓ ideal for demanding uses
- ✓ to achieve best results, the unroll length should at least be adjusted to the corresponding image size

art.-no.	width	length in m
55479 0003	50 mm	66 m
55479 0004	75 mm	66 m
55479 0005	100 mm	66 m
55479 0006	130 mm	66 m
55479 0001	150 mm	66 m
55479 0007	175 mm	66 m
55479 0002	200 mm	66 m
